

Adam Labadie, is the inventor of Arch Cart Sanitizer, an automated solution for grocery cart sanitation. His goal is to provide a long-term alternative to 2.8 billion one-time use grocery cart wipes used each year.

Adam is an inventor, born and raised in Tampa Bay. He loves the water, cycling and being with family.

**ENGINEERED WITH SUSTAINABILITY
& SAFE SANITATION IN MIND**

**OUR MISSION IS TO TRANSFORM
GROCERY AND MEDICAL CART
SANITATION FROM ONE-TIME USE WIPES
TO AN SUSTAINABLE LONG-TERM
AUTOMATED SOLUTION**

www.ARCHCLEAN.COM

It is estimated that 20 million grocery carts get touched a minimum of 200 times a day, on average, spreading disease from human- to-human while picking up food for consumption.

CURRENT CART

SANITIZATION PROCEDURES ARE COSTLY AND WASTEFUL

- The grocery industry alone is projected to spend \$150 million in one-time use grocery sanitizing wipes.
- Disposable wipes generate 7.6 billion pounds of garbage and account for 2 million tons of plastic waste per year, making it the third largest consumer item in landfills . Source : <http://www.designlife-cycle.com/disposable-wipes-lifecycle>
- Grocery stores have had to bear the brunt of the cost to band-aid these issues. To hire a “cart attendant” to wipe down one cart at a time ends up costing an estimated \$171M in 2020 alone.

Cost-Effective and Consistent Cart Sanitization

with EPA-approved chemicals to kill COVID-19

EPA Registration # 74986-5

KEY FEATURES:

- 1 Designed to fit all shopping carts.
- 2 4 Electrostatic atomizing sprayers.
- 3 Utilizes single 110v to operate.
- 4 Universal water hose hookup to transfer fluid into holding tank.
- 5 Secondary filler neck.
- 6 Emergency stop button.
- 7 Low level warning light.
- 8 Exterior customization to match build aesthetics.

Reduced Chemical
Consumption by 70%

Electrostatic Spray
Technology covers
entire cart

Reduce-One Time Use
Wipes

Remote control, requiring no
additional action

No drain pan required

No Maintenance Required
